

ASX RELEASE

APPENDIX 4C – QUARTERLY CASH FLOW REPORT – MARCH 2016

PERTH, AUSTRALIA; 29 APRIL 2016: Hazer Group Limited (ASX: HZR) lodges the attached Appendix 4C Quarterly Cashflow Report for the period ended 31 March 2016.

Commentary is provided as follows:

- The Company had cash reserves of \$5.15 million as at 31 March 2016. Cash reserves increased by \$0.55 million during the quarter following the successful completion of a \$0.895 million placement to a strategic investor. The Placement price of \$0.28 per share represented a 40% premium to the company's IPO price from late 2015.
- Net operating cashflow during the quarter was (\$0.288 million) with initial research and development expenditure associated with the University of Sydney research collaboration commencing.
- During the quarter the Company successfully established a number of important building blocks to further the development and commercialisation of the Hazer Process; these include:
 - a research collaboration agreement with Sydney University which provides access to the world class facilities of the University's Laboratory of Sustainable Technologies ("LST"). The LST has particular expertise in graphite and nano-materials technology as well as chemical engineering scale up expertise and experience in the "hydrogen economy". Formal documentation has now been executed and development activities have commenced;
 - relocation of the Company's Chief Technical Officer, Dr Andrew Cornejo, to Sydney to actively manage and direct all activities undertaken with Sydney University;
 - reaching agreement with the University of Western Australia ("UWA") for an ongoing research collaboration to develop the Hazer technology for the production of graphene. UWA has already demonstrated the successful synthesis of graphene using the Hazer Process and will identify conditions to improve the quality and quantity of graphene produced. Execution of formal documentation and the commencement of research activities is expected during the June quarter;

- a partnership with chemical engineering group Kemplant Pty Ltd who will assist the Company with its current scale up development and also work towards the design of an initial demonstration plant to showcase the Hazer technology; and
- the appointment of Mr Terry Walsh to the Company's management team as Chief Development Officer. Mr Walsh was most recently the General Counsel of Hancock Prospecting Pty Ltd and prior to that was Corporate Counsel with Rio Tinto Ltd. In these roles he has been involved with the legal and commercial aspects associated with the development, funding and operation of major mining and engineering projects.
- The Company reiterates that it will own all Intellectual Property developed through the Sydney University and UWA collaborations, and so will continue to own all the Intellectual Property associated with the Hazer Process royalty and encumbrance-free.
- The Company is well funded to undertake the core development activities necessary to further commercialise the Hazer Process.
- Research and development expenditure is expected to increase in the next quarter as development activities with Sydney University and UWA increase.

Geoff Pocock, Managing Director

About Hazer Group Limited

Hazer Group Limited (“Hazer” or “The Company”) is an early stage technology development company undertaking the commercialisation of the Hazer Process, a low-emission hydrogen and graphite production process. The Hazer Process was developed by researchers at The University of Western Australia (UWA) over several years, before the intellectual property rights were assigned to the Company for further commercial development.

The Hazer Process enables the effective conversion of natural gas, and similar feedstocks, into hydrogen and high quality graphite, using iron ore as a process catalyst. The aim of the Hazer Process will be to achieve savings for hydrogen producers, as well as providing 'clean' hydrogen (i.e. with significant lower production of carbon dioxide emissions), enabling such hydrogen to be used in a range of developing 'clean energy' applications, as well as in large existing chemical processing industries. The graphite produced by the Hazer Process is high purity (>90%wt), highly crystalline 'synthetic' graphite as is generally used in batteries and other high value graphite applications.

Hazer Group Limited - Social Media Policy

Hazer Group Limited is committed to communicating with the investment community through all available channels. Whilst ASX remains the prime channel for market sensitive news, investors and other interested parties are encouraged to follow Hazer on Twitter (@hazergroupltd), LinkedIn, Google+ and Youtube.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
2. The definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report except for any additional disclosure requirements requested by AASB 107 that are not already itemised in this report.
3. **Accounting Standards.** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

+ See chapter 19 for defined terms.
